

# FarrVac Junior

## Pulse Cleaned Industrial Vacuum with HEPA Filtration

Maintains Constant Suction During Operation by Preventing Clogs

The FarrVac Junior is a heavy duty industrial vacuum with pulse-cleaning filters that drastically minimizes clogs. Dual stage HEPA filtration captures dust particles as small as .3 micron at an efficiency rating of 99.97%. It can be used for everyday shop cleanup and makes the perfect accessory to the Gold Series dust collector when replacing or emptying dust discharge devices such as drums or drawers.

### Standard Features & Benefits —

- Patented filter pulse cleaning technology requires NO compressed air.
- Filters are pulse cleaned of dust and debris every 10 seconds during operation, preventing filters from ever clogging.
- Cyclonic design reduces filter exposure to debris
- Durable spun bond polyester HEPA filters capture dust particles to .3 micron and last 10 times longer than conventional filters.
- All metal parts are galvanized or powder coated to withstand even the harshest environments.

### Durable Spun Bond Filters

Durable HEPA rated spun bond polyester filters:

#### 1st Stage:

Two H-13 HEPA Filters

#### 2nd Stage:

One Industrial HEPA rated IEST RP-CC001.4 Filter

### Specifications:

- Motor CFM: 120
- Sealed Lift: 73"
- Tank Capacity: 8 gallons
- Voltage: 120VAC, 50/60 Hz
- Current: 10.2 Amps
- Dimensions: 15"W x 25" H x 16.25"L
- Overall Weight: 30 lbs.
- Inlet Size: 2" diameter
