

FarrVac

Pulse Cleaned Industrial Vacuum

Maintains Constant Suction During Operation by Preventing Clogs

The FarrVac is a heavy duty industrial vacuum with pulse-cleaning filters that drastically minimizes clogs. This prevents the loss of suction (lift) during operation. It can be used for everyday shop cleanup, as a dedicated dust collector for a single process machine, and makes the perfect accessory to the Gold Series dust collector when replacing or emptying dust discharge devices such as drums or drawers.

Standard Features & Benefits —

- Patented filter pulse cleaning technology – no compressed air required.
- Cyclonic design reduces filter exposure to debris
- Durable PTFE coated spun bond polyester filters capture dust particles to .1 micron and last 10 times longer than conventional filters.
- Sturdy wide-stance dolly for easy, yet stable maneuverability
- All metal parts are galvanized or powder coated to withstand even the harshest environments.
- A tank capacity sensor prevents the FarrVac from over filling, which can cause damage to the filters and motor components.

Durable spun bond filters

Double seal ensures rated efficiency

Specifications:

- Motor CFM: 170
- Sealed Lift: 110"
- Tank Capacity: 16 gallons
- Decibel Level: 86 dBA
- Voltage: 120VAC, 50/60 Hz
- Current: 15.1 Amps
- Dimensions: 23"W x 39" H x 21"L
- Overall Weight: 82 lbs.
- Inlet Size: 2" diameter

Safety & Protection

Dust removal performance over time

FarrVac dust removal performance stays constant over time unlike other manufacturers.

Filter Replacement Kit

P/N 218238001

FarrVac Accessories

P/N 218237001

FarrVac Drum Extender

The optional drum extender allows the FarrVac head unit to be mounted on a 55-gallon drum instead of the 16-gallon tank. Dolly for 55-gallon drum is also available.

FarrVac Hose

25' x 2" Static conductive vacuum hose.

Dolly for 55-gallon Drum

8-Wheel heavy duty drum dolly for under 55 gallon drum to make maneuvering drum easier. Drum dolly is rated for 2,000 lbs.

FarrVac Wand & Floor Sweep

56" x 1.5" diameter button-locking, two-piece lightweight aluminum wand and 18" floor sweep.
